About Us

ATC is a leading systems integrator based in the UAE.

Established in 2010 as a member of Emirates Advanced Investment Group, being the managed services provider for more than 40 corporations with stringent SLAs, it is %100 EAIG owned entity.

As a hardware reseller in its early years as well managed services provider, the company evolved to become partner of choice with many global ICT blue chips.

As the market evolved, ATC re-positioned its portfolio offerings and re-structured the organisation to focus on application solutions. In 2013, it began to offer implementation services for smart government services, managed infrastructure, SDN, NGN and healthcare management solutions, demonstrating real added value to customers.

Vision

Using our extensive ICT industry expertise, we are empowered to create a company that is customer focused, creative, astute and knowledgeable about prudent industry practices. We aspire to be at the forefront of technology trends and changes, and aim to be the market leader in state of the art solutions.

Mission

To be the partner of choice for our customer's ICT strategies and services, which can deliver long term commercial benefits and help them in digital transformation through our IPs and best practices.

What We Do

ATC's team of highly skilled professionals plans, designs, and implements technology infrastructure with the support of a growing partnership network with worldwide players.

ATC Focuses on 3 main expanses: Infrastructure solutions, Application solutions, and Licensing, consultancy and support.

As a Systems Integrator, we ensure that these intertwine into end-to-end solutions.

Our competitive advantage lies in our set of operational competences: today, ATC is the preferred local systems integrator for major market sectors such as government, semi-government, oil and gas, education and health.

INFRASTRUCTURE TO PRIVATE SOLUTIONS

We provide direction to setup infrastructure with load balancing and advanced network capabilities. We enable you to build stable and safe networking for your services deploying storage requirements based on your business needs and consumption.

Makeen MicroDC

Is an all-in-one server room in a box, featuring complete mission critical server room infrastructure manufactured and certified in Canada, the Makeen MicroDC unit can be delivered and installed as a ready-to-use appliance within weeks.
